

The Nashville Health Care Council is more than a networking community; it's your year-round strategy partner and connection hub. The Council exists to strengthen and elevate Nashville as the Healthcare City. We do this by amplifying the Nashville healthcare story; developing talent; and positioning Nashville as a destination of choice where healthcare companies, innovation, and talent can thrive.

Your membership investment supports our mission while investing in what matters most for your team: strategic programming, critical conversations, and talent development that engages your entire organization and advances your leadership continuum. Explore engagement opportunities by audience to learn how your leadership will benefit.
